

**AMERICA'S  
SEED FUND**

— SBIR —

POWERED BY

## **MISSION**

The Centers for Disease Control and Prevention (CDC) works 24/7 to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same.

# **CENTERS FOR DISEASE CONTROL AND PREVENTION**

## **BUDGET**

~\$15M SBIR budget

## **NUMBER OF AWARDS**

Approximately 30–50 SBIR awards per year

## **TOPIC AREAS/AREAS OF INTEREST**

CDC encourages investigator-initiated applications that focus on support for the prevention, detection, and response to emerging public health threats and that align with the agency's overall mission and the research areas of CDC Centers, Institute, and Offices (CIOs).

CDC's SBIR Program focuses on innovations in diagnostics, data science (e.g., advanced analytics and visualizations), surveillance, occupational safety and health, and public health to support the health promotion and disease prevention needs of CDC.

## **UNIQUENESS**

CDC increases the health security of the United States. As the nation's health protection agency, CDC saves lives and protects people from health threats. For more than 70 years, we've put science into action to help children stay healthy so they can grow and learn; to help families, businesses, and communities fight disease and stay strong; and to protect the public's health. Learn more at: <https://www.cdc.gov/about>

CDC is a public health agency dedicated to saving lives and making the world a safer, healthier place. CDC's 24/7 role includes:

- Detecting and responding to new and emerging health threats
- Tackling the biggest health problems causing death and disability for Americans
- Putting science and advanced technology into action to prevent disease
- Promoting healthy and safe behaviors, communities, and environment
- Developing leaders and training the public health workforce, including disease detectives
- Taking the health pulse of our nation

CDC's SBIR Program provides technical and business assistance (TABA) funding, expertise, and resources for Phase I and Phase II awardees.
